

MD SARFARAZ NASIRJAH

Full Stack Developer | React.js & Node.js Developer

+91-8919290864 | mdsarfraz191199@gmail.com | linkedin.com/in/md-sarfraz-nasirjah-29354a198 | Hyderabad, India

PROFESSIONAL SUMMARY

Full Stack Developer with 5 years of experience specializing in React.js, Redux, TypeScript, and Node.js, building scalable, responsive web applications for government, banking, and enterprise platforms. Expertise in role-based dashboards, dynamic query builders, RESTful APIs, and GIS-based geospatial visualization, with hands-on Node.js/Express.js development, SQL/NoSQL (MongoDB) database design, WebSocket updates, Apache NiFi pipelines, and JWT authentication. Skilled at translating Figma/UX wireframes into 30+ reusable React components, writing unit/integration tests, and delivering mission-critical platforms across agile, cross-functional teams.

TECHNICAL SKILLS

Core Frontend: JavaScript (ES6+), React.js, Redux, React Hooks, Context API, React Router, TypeScript

Back-End Development: Node.js, Express.js, RESTful API Design, Server-Side Logic, MVC Architecture

UI & Styling: HTML5, CSS3, Bootstrap, Responsive Design

Database Management: MongoDB, SQL, NoSQL, MySQL, Query Optimization

Data Visualization: Chart.js, Recharts, D3.js, Leaflet.js, MapMyIndia APIs, Google Maps

API & Integration: REST APIs, Axios, WebSockets, JSON, JWT Authentication, Apache NiFi

State Management: Redux, Redux Thunk, Context API

Forms & Validation: Formik, React Hook Form, custom validation workflows

Testing & Quality: Chrome DevTools, Postman, Unit Testing, Integration Testing, Cross-Browser Testing

Tools & Workflow: Git, GitHub, GitLab, Jira, VS Code, Figma (review)

Concepts: Role-Based Access Control (RBAC), Component Architecture, Full Stack Development, Lazy Loading, Code Splitting, Performance Optimization, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PruTech Solutions India Pvt Ltd

Oct 2024 - Present

Hyderabad, India

ICCC Converge - Bihar State Cooperative Bank

Feb 2025 - Sept 2026

- Led frontend development from inception across dynamic dashboards, query builder, bank/branch management, and user role management, converting Figma wireframes into 30+ reusable React components.
- Architected a role-based Dashboard Builder for 4 user types (Super Admin, Head Office Admin, Bank, Branch) with configurable widgets (cards, charts, tables, maps, tree selectors), draft/publish workflows, and bank/branch-level data filtering - rolled out across all 24 cooperative banks in Bihar, reducing new dashboard setup time by 60%.
- Created a Query Builder enabling non-technical users to construct table joins, aggregations, filters, and sorts, with save/reuse of queries as live data sources at the widget level, fully integrated with Apache NiFi for backend query management.
- Implemented role-based access controls and secure communication modules using Node.js/Express.js REST APIs and MongoDB data storage, supporting real-time incident, alert, and analytics monitoring across the ICCC platform.
- Owled the Grievance/Ticketing Management module end to end for 6 roles (L1, L2, L3, Head Office, Super Admin, Support Admin), covering ticket creation, dynamic validation, helpdesk filtering, SLA-based auto-escalation, hierarchical reassignment, bidirectional status workflows (In Progress, Pending at User/Vendor, Resolved, Closed, Reopened), bulk actions, WebSocket notifications, and PDF/Excel export - cutting resolution turnaround by 40%.

iResponse - Bihar Flood Management

Oct 2024 - Feb 2025

- Engineered the Situation Awareness / GIS page with real-time mapping and spatial data visualization for statewide disaster monitoring, plotting incidents by latitude/longitude with linked media (images, video) for faster field assessment.
- Built 6 monitoring dashboards (Flood, Fire, Human Loss, Heatwave, Coldwave, Incidents) with interactive charts and dynamic GIS maps to support real-time decision-making.
- Developed the Task and SOP Management module with assignment tracking and real-time progress monitoring for field-officer response coordination.
- Built reporting modules with UI-driven data-capture forms and automated PDF/Excel report generation matching required formats, cutting manual report preparation by 50%.

Project Engineer | Wipro

Nov 2021 - Sept 2024

Hyderabad, India

BMI Application

Dec 2021 - Sept 2024

- Analyzed Business Requirement Documents (BRD) and Functional Specification Documents (FSD) to translate enterprise requirements into React JS component designs.
- Produced enterprise web applications in HTML5, CSS3, JavaScript (ES6+), and React JS, integrated with RESTful APIs and reusable service layers, with unit/integration testing.
- Assembled 20+ reusable UI components with Material UI and Syncfusion, reducing feature development time by 25%.
- Managed application state with props and Redux, and secured routes using JWT (JSON Web Token) middleware authentication.

EDUCATION

B.Tech, Electronics and Communication Engineering

Jul 2017 - Oct 2021

G. Pullaiah College of Engineering and Technology, Kurnool, Andhra Pradesh
